Dear Potential User:

Our refuse vehicle is ideal for your parks and/or beaches.

Utilize your workers more efficiently . . . in these economic times one worker and the Load-and-Pack can handle your parks or beaches nicely.

Empty your garbage cans up to four times faster . . . automation sets the tone and your workers love it.

Put your workers in an air conditioned/heated cab . . . stop complaints with their work environment, now! Units offer an air ride cab and seat . . . for a smooth and comfortable ride. 3 way cameras offer safety views (to the sides and rear).

And one work comp claim could pay for your Load-and-Pack – maybe even several times over . . . and it's safe, easy, reliable and more convenient to use.

We can virtually eliminate your lifting work comp claims using our system of refuse collection.

Our system **pays for itself** in as little as 2 ½ years (depending on your current method) or immediately with one excessive work comp claim.

A partial list of our users is included for your perusal. I think you'll agree that we are keeping some very fine company and once our customers have used our Load-and-Pack it is reordered time and time again. **It really does do the job, properly!**

One person can **pick up 400+ containers in a normal working day** – without ever leaving the cab except to facilitate the 7cuyd box with off-loading when it is full and on-loading an adjacent empty box to continue the designated route.

Our 7 cuyd box **compacts on the go (4 to 1)** thus holding 28 cuyd of refuse before needing an empty replacement to continue the route. Our new 9.5 cuyd box also compacts at 4 to 1 and will hold an amazing 38 cuyds. The 9.5 is being tested in two locations and will be available soon.

We encourage you to **request a personal visit** from our staff at no charge to learn more about this exciting refuse vehicle for parks and beaches. You can also view our video at www.broyhill.com in the solid waste header. **Thank you for your interest!**
